---

## SENIOR FLUTTER DEVELOPER

With a decade of experience in software development, I specialize in Flutter and Dart, bringing focused expertise to creating high-quality applications. My strength lies in leveraging Flutter's capabilities to build robust, cross-platform solutions that deliver seamless user experiences. I prioritize clean architecture and rigorous unit testing in Flutter to ensure scalable, maintainable, and reliable software. Over the past two years, I have honed my leadership skills as a team leader, successfully managing project timelines, mentoring team members, and fostering a collaborative team environment.

---

## PROFESSIONAL EXPERIENCES

**Zazmic Inc, Ukraine**

**Jun 2024 - Aug 2024**

**Senior Flutter Developer**

*Contractor - Remotely - Outstaffing for Barsys Inc*

- Integrated Flutter into native iOS and Android applications, enhancing cross-platform capabilities.
  - Conducted adaptive development to ensure the Flutter project operates seamlessly on the web platform.
  - Established and integrated a CI/CD pipeline using Codemagic, streamlining the development and deployment process.
  - Implemented a feature-first architecture, ensuring modularity and scalability within the project.
- 

**Hologram Sciences - Boston, MA**

**Jan 2017 - Mar 2024**

**UI Team Leader / Senior Mobile Application Developer**

*Contractor - Remotely*

- Led the development and release of six cross-platform mobile applications, improving user engagement in the health and wellness sector. Key projects included Eatwithava, Nutria, Gogo, Optijourney, Phenology, and d.velop.
  - Headed the UI team for two years, overseeing project timelines and mentoring team members to encourage collaboration and innovation.
  - Integrated Bluetooth Low Energy (BLE) devices into our apps, enhancing real-time data collection and ensuring reliable data syncing.
  - Participated in daily stand-ups, sprint planning, and retrospectives to align project goals with business objectives and maintain strong team communication.
  - Developed the Centrum web app using ReactJS, which features advanced API integrations and modern UI/UX designs.
  - Engineered an Admin Panel using AngularJS to support backend management and streamline user data processing and analytics.
-

**trendyol.com, Turkiye**  
**Full Stack Developer**

**Jan 2016 - Jan 2017**

*Full Time - In Office*

- Spearheaded full-stack development for a critical administrative project on trendyol.com, optimizing product listing and management processes using C# .NET for the backend and AngularJS for the frontend.
- Developed ASP.NET MVC and Web API projects to facilitate seamless communication and data exchange within the e-commerce platform.
- Implemented technical enhancements such as advanced data management, API optimization, and user-friendly interfaces, improving system efficiency and user experience.
- Proficient in MSSQL, using database management skills to develop and maintain robust backend solutions, ensuring data integrity and reliability.

.....

**Neutec Technology, Turkiye**  
**Junior Software Developer**

**Jun 2014 - Jan 2016**

*Full Time - In Office*

- Played a key role in maintaining and enhancing software solutions, focusing on bug fixes and feature development to boost application performance and user satisfaction.
- Engaged in developing N-tier architecture software using .NET technologies, adhering to design specifications and meeting user requirements, which led to the delivery of high-quality applications on time.
- Designed and implemented web pages with a focus on usability and aesthetics using HTML, JavaScript, jQuery, CSS, and Bootstrap, including layout, design, and graphic integration.
- Conducted thorough troubleshooting and problem-solving in response to customer requests and QA findings, ensuring timely and effective issue resolution.

---

**FLUTTER SKILLS**

- Profoundly skilled in using the Flutter framework to create high-performance, visually appealing mobile applications.
- Expert in Dart, the programming language for Flutter, which ensures efficient and effective codebase management.
- Implements various state management techniques like BLoC, Riverpod, and Redux to ensure maintainable and scalable app architecture.
- Enhances software architecture and system scalability with expert knowledge in object-oriented analysis and design.
- Utilizes and customizes Flutter widgets to create responsive and intuitive user interfaces.
- Implements comprehensive automated testing in Flutter, including unit, widget, and integration tests, following test-driven development practices to ensure high-quality applications.
- Creates engaging and dynamic user interactions using Flutter's advanced animation toolkit.
- Applies security best practices in Flutter applications to protect user data and ensure application integrity.
- Skilled in implementing Material Design and Cupertino widgets to adhere to platform-specific conventions.
- Enhances application performance and user experience by utilizing multi-threading and managing concurrency in Flutter.

## **MOBILE APP DEVELOPMENT SKILLS**

- Expert in creating pixel-perfect interfaces and improving user experiences with smooth animations and intuitive navigation.
- Implements key design principles like SOLID, KISS, and DRY to enhance the quality, maintainability, and scalability of mobile applications.
- Utilizes object-oriented and functional programming principles to improve code modularity, scalability, and maintainability in mobile development.
- Designs scalable application architecture in Flutter to accommodate growth and additional features over time.
- Focuses on performance optimization to ensure mobile applications run smoothly and provide excellent user experiences.
- Navigates app store deployment processes expertly, ensuring compliance with operational standards for iOS and Android.
- Skilled in integrating third-party services such as maps, payment gateways, and social media APIs into applications.
- Develops multilingual applications to cater to a global audience.
- Implements dynamic theming and styling to support diverse user preferences and enhance app personalization.
- Uses Firebase and Supabase for backend services like authentication, database management, and analytics.
- Implements Continuous Integration and Continuous Deployment pipelines to streamline development and release processes.

## **COMMON SKILLS**

- Expert in using Git for source code management and collaborative development.
- Works in dynamic development environments to solve problems and implement designs.
- Maintains high standards of code quality and application reliability through effective code reviews and debugging practices.
- Converts strategic business requirements into technical solutions that align with organizational goals.
- Guides team dynamics and sprint planning in Agile project management to optimize workflow and achieve project goals.
- Tackles complex system architectures and technical challenges with advanced problem-solving skills.
- Continuously learns and adopts new technologies to drive software excellence and innovation.
- Cultivates technical skills and professional growth among team members through effective mentorship.
- Designs scalable architectures capable of handling increasing loads and future expansion.
